

OnDemand Presenter

Create, Engage, Educate, Ensure Proficiency

PRODUCT INFORMATION

Communicating information to various audiences throughout each phase of your project is imperative to realizing a successful implementation. You need a vehicle for creating content, educating your employees, and ensuring ongoing proficiency.

OnDemand Presenter provides the ability to develop robust multimedia content allowing you to easily incorporate conceptual information into interactive presentations. For added impact, audio can be used to emphasize the project and change management goals.

Instantly convert PowerPoint® presentations to extremely compact, high-fidelity Adobe Flash files for easy deployment within your IT infrastructure. You can edit using sophisticated recording, editing, and synchronization tools as well as group slides into topics for more organized presentations. Easily add quizzes and surveys to track the results of your presentations in SCORM-compliant learning management systems.

The newly published presentation can be easily incorporated into an OnDemand Knowledge Pathways® knowledge path. In addition the published presentation can be integrated with your OnDemand Personal Navigator™ materials. You can even publish the audio narration to MP3 format to support podcasts and other audio broadcasts.

EASILY TURN SIMPLE PRESENTATIONS INTO SELF-DIRECTED COURSES

With OnDemand Presenter you can add interactive features to your training presentations.

- **Audio Narration:** Record a narrative for your presentation and synchronize it with your slides and animations. Add background audio for a professional effect.
- **Flash Movies:** Easily add Flash graphics, movies, applications, and video to your PowerPoint slides.
- **Quizzes & Surveys:** Create interactive Flash quizzes and surveys, choosing from fourteen different question and survey types.
- **Table of Contents:** Group slides under section headings for quick and easy navigation in the converted presentation.
- **OnDemand Personal Navigator:** Easily add OnDemand Personal Navigator topics to your presentation slides.

About OnDemand Software, a Division of Global Knowledge

OnDemand Software is a recognized leader in providing software solutions that enable rapid user adoption and accelerate the return on investment for enterprise application implementations. With OnDemand Personal Navigator, the synchronized content development platform for documentation, training, and in-application performance support, organizations can increase enterprise application utilization, realize faster time to competency, and reduce training costs and content development time. Founded in 1986, OnDemand Software is headquartered in King of Prussia, Pennsylvania, with offices worldwide and products in 14 languages. More than 850 Global 2000 companies are deriving greater business value from their enterprise applications with OnDemand Software. We fuse people, process, and technology to mitigate risk and enable seamless change management.

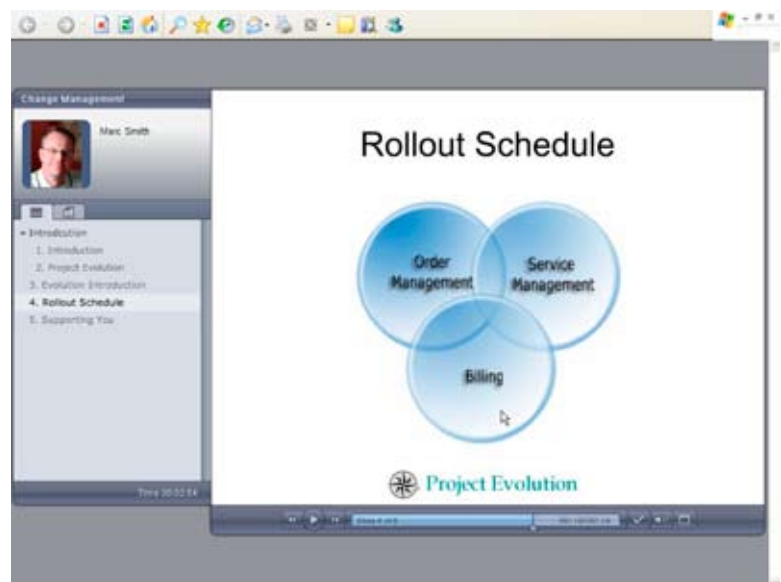

Record and synchronize narration while in your presentation

Easy to Create

- Record your narration while in your PowerPoint presentation.
- Incorporate slide notes as a script to aid in recording narration in individual slides.
- Time narration in sync with any slide, build, or animation.
- Publish instantly into a compact Adobe Flash presentation.

Easy to Playback

- The compact, high fidelity Adobe Flash files are easy for your end users to view.
- Presentation scripts can be viewed while in the presentation for added impact.
- The combination of visuals, narration, and scripts improves retention and change management success.

Published presentation can be easily incorporated into an OnDemand Knowledge Pathways knowledge path
