- Available in 12 languages

BENEFITS

- Ease course development.
- Aggregate content in a central repository
- Track and assess competency to evaluate performance
- Deliver personalized company information when, where, and how employees, partners, and suppliers want it

Oracle User Productivity Kit Professional's Knowledge Pathways designer, manager, and player modules help maximize the return on investment (ROI) of enterprise applications by improving end-user proficiency, ensuring change management, and achieving organizational readiness. With these modules, you can aggregate and deliver content in a Web-based environment to support enterprise application implementations and other learning initiatives.

Provide a Central, Easy-to-Search Knowledge Portal

Keeping stakeholders abreast of project plans, business processes, and training materials is critical to the success of any project. Knowledge Pathways player module is an easy-to-search knowledge portal that provides stakeholders, project managers, and employees with access to a central repository of all your project assets. Offering advanced search capabilities, the player module allows you to easily search for files from Oracle User Productivity Kit; Adobe Acrobat; and Microsoft Word, Microsoft Excel, and Microsoft PowerPoint.

Enable Easy Course Development and Delivery

The right amount of training at the right time is critical for end-user adoption. Knowledge Pathways designer module allows you to customize courses for role-specific training to ensure organizational readiness in the most efficient manner. With a robust HTML editor for content creation and reuse, you can create, import, store, and reuse content in new courses, thereby preserving your investment in existing content.

From a single content source, you can deliver training courses via the internet, intranet, CD-ROM, and classroom, or through an existing learning management system such as Oracle iLearning, SAP Learning Solution, and Saba Learning Suite. The designer module can incorporate nearly any Web-playable content, including Oracle User Productivity Kit simulations.

Track and Assess User Competency

Evaluating performance is key to ensuring ongoing organizational competency and creating a successful learning culture. Knowledge Pathways manager module allows your administrators to manage user enrollment, create knowledge paths, track user progress, and assign reports to gauge organizational readiness and proficiency. This ensures rapid user adoption and continuous user competency.

Accelerate Multilanguage Implementation

The Knowledge Pathways designer, manager, and player modules included with Oracle User

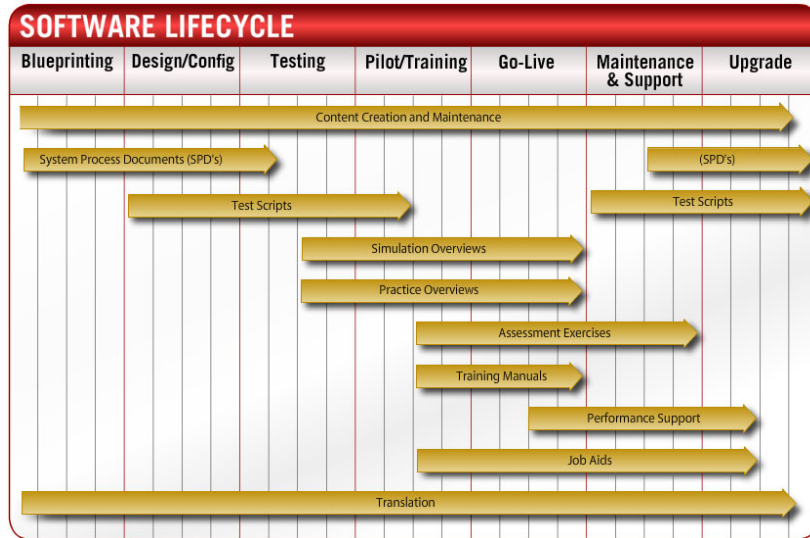

RELATED PRODUCTS
